

## LABCORP DIAGNOSTIC ASSISTANT

# Enhancing the rheumatologist experience and improving patient outcomes

Easy access to all patient results and reports in one place, reduced need for phone calls and seamless integration within your electronic health record (EHR)\*

Labcorp Diagnostic Assistant streamlines patient care by providing all of a patient's Labcorp results in one convenient place. Eliminate the hassle of searching through multiple systems making countless phone calls. Diagnostic Assistant makes it easy for healthcare professionals to access all of the information they need, helping to save time and allowing them to focus on what matters most—patient care.

\*Currently compatible with Athenahealth, Oracle, eClinicalWorks and Epic

### Using Diagnostic Assistant in rheumatology practices

For **new patients**, see lab results for tests performed prior to their referral or their first rheumatology visit.

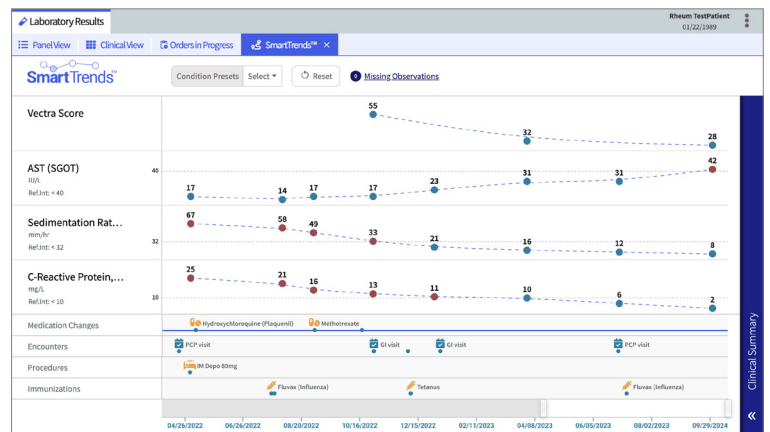

For **hospitalized patients**, get direct access to critical labs.

For **existing patients**, maintain visibility into labs ordered by other providers or hospitals caring for your patient.

### SmartTrends™ visualizations for rheumatologic conditions

Get a combined view of a patient's EHR data and Labcorp lab results to monitor relevant results for patients with complex rheumatologic diseases.

- Filter lab tests based on specific conditions
- Trend lab results on a single line, regardless of performing lab or ordering provider
- View lab results from Labcorp and your EHR
- See integrated labs, vitals, medications and other clinical data in a single view across a timeline
