

September 2025

Dear Valued Client,

This communication serves as a reminder to you regarding the annual ICD-10-CM coding update for 2026, which is effective for dates of service on or after October 1, 2025.

The Health Insurance Portability and Accountability Act (HIPAA) transaction and code sets rule requires the use of the medical code set that is valid at the time the service is provided. ICD-10-CM diagnosis codes are considered a medical code set.

The ordering physician is responsible for providing a diagnosis code(s) based on the signs and symptoms of the patient. ICD-10-CM diagnosis codes are required by third-party payers to document the medical necessity of the test(s) and/or profile(s) ordered. Physicians are asked to submit all medically appropriate ICD-10-CM diagnosis codes when ordering laboratory testing.

There are approximately 688 ICD-10-CM code updates effective October 1, 2025. Listed below and on the reverse are the 10 most common diagnosis codes received by Labcorp that will be invalid after September 30, 2025; their valid replacements must be provided beginning on October 1, 2025. For a complete list of diagnosis code updates, please visit the following website:

Thank you for your cooperation as we continue to meet your patients' laboratory testing needs.

Sincerely,

Labcorp
