

Austin, TX

Labcorp's Rapid Response Test Menu for Austin, TX

Labcorp recognizes the evolving healthcare needs of physicians; simply put, certain test information is essential to help make immediate, informed decisions about a patient's care. Labcorp's goal is to provide you with STAT results within four hours of your request for pick up.

The following steps will help Labcorp process your patient's lab work when it arrives at the testing site:

- Verify that the STAT test(s) request is/are available on the STAT Test Menu and that the request is within the STAT hours of operation (see reverse).
- Label all specimens with two identifiers (patient's name, date of birth, and/or test request form ID label). Time of collection is required information on the test request form.
- If routine, non-STAT testing is needed in addition to the STAT test(s), collect separate specimens for the routine and STAT testing and submit each on a separate test request form. The non-STAT specimen cannot be picked up with the STAT specimens and will be picked up and tested according to our usual, non-STAT schedule.
- Call the Labcorp direct toll-free number for STAT pick-up service at 1-866-STATTWO (1-866-782-8896) and be prepared to provide:
 - Caller name;
 - Account's name and number;
 - Pick-up address;
 - Requisition or control number;
 - Patient's name and date of birth;
 - STAT test name/number(s);
 - Storage requirements (specify if specimen needs to be kept frozen);
 - Preference of STAT reporting (call or fax as well as name and numbers).
- Send only STAT specimens with the STAT courier. Routine, non-STAT specimens should be sent with the routine courier.
- STAT testing is only performed on one-time orders.
- Standing orders will not be accepted as STAT if the patient is sent to a Labcorp patient service center to be collected. You may request "same-day" testing for routine testing on a patient's standing order by noting "same-day" on the original test request form.

STAT TESTING

Austin, TX

Hours available: 8 a.m. to 5 p.m.

Test Name	Test No.
Acetaminophen*	007740
Ammonia, Plasma*	007054
Amylase**	001396
Bilirubin, Total and Direct	001214
Carbamazepine, Serum or Plasma	007419
Cell Count, Cerebrospinal Fluid*	005256
Complete Blood Count (CBC) With Differential, Reflex to Peripheral Smear Review	005009
Complete Blood Count (CBC) Without Differential	028142
D-Dimer*	115188
Digoxin, Random	007566
Electrolyte Panel	303754
Erythrocyte Sedimentation Rate	005215
Ethanol, Whole Blood	017996
Fetal Fibronectin	120857
Gentamicin Random, Serum*	007161
Glucose, Cerebrospinal Fluid*	002048
Hemoglobin (Hb) + Hematocrit	031088
Hepatic Function Panel (7)**	322755
Human Chorionic Gonadotropin (hCG), β -Subunit, Qualitative	004556
Human Chorionic Gonadotropin (hCG), β -Subunit, Quantitative	004416
Influenza A, Influenza B and Respiratory Syncytial Virus, NAA*	140163
Iron**	001339
Lactic Acid Dehydrogenase (LD)**	001115
Lipase	001404
Lithium	007708

Test Name	Test No.
Magnesium**	001537
Metabolic Panel (14), Comprehensive	322000
Mononucleosis Test, Qualitative*	006189
NT-proBNP*	143000
Partial Thromboplastin Time (PTT), Activated	005207
Phenobarbital, Serum or Plasma	007823
Phenytoin, Serum or Plasma	007401
Phosphorus**	001024
Platelet Count	005249
Potassium	001180
Pregnancy Test, Urine	004036
Progesterone	004317
Protein, Total, Cerebrospinal Fluid*	002055
Prothrombin Time (PT)	005199
Renal Function Panel**	322777
Respiratory Syncytial Virus (RSV), Immunoassay	014548
Salicylate*	007849
Sodium	001198
Tobramycin Random, Serum*	007153
Troponin I High Sensitivity*	121185
Uric Acid**	001057
Urinalysis, Complete With Microscopic Examination	003772
Urinalysis, Routine With Microscopic Examination on Positives	003038
Valproic Acid, Serum or Plasma	007260
Vancomycin Random, Serum	070326

*STAT tests referred to local reference hospital regardless of time

**Tests not available after hours
