## Labcorp's Rapid Response Test Menu for Houston, TX

Labcorp recognizes the evolving healthcare needs of physicians; simply put, certain test information is essential to help make immediate, informed decisions about a patient's care. Labcorp's goal is to provide you with STAT results within four hours of your request for pick up.

### The following steps will help Labcorp process your patient's lab work when it arrives at the testing site:

- Verify that the STAT test(s) request is/are available on the STAT Test Menu and that the request is within the STAT hours of operation (see reverse).
- Label all specimens with two identifiers (patient's name, date of birth, and/or test request form ID label). Time of collection is required information on the test request form.
- If routine, non-STAT testing is needed in addition to the STAT test(s), collect separate specimens for the routine and STAT testing and submit each on a separate test request form. The non-STAT specimen cannot be picked up with the STAT specimens and will be picked up and tested according to our usual, non-STAT schedule.
- Call the Labcorp direct toll-free number for STAT pick-up service at 1-866-STATTWO (1-866-782-8896) and be prepared to provide:
  - Caller name;
  - Account's name and number;
  - Pick-up address;
  - Requisition or control number;
  - Patient's name and date of birth;
  - STAT test name/number(s);
  - Storage requirements (specify if specimen needs to be kept frozen);
  - Preference of STAT reporting (call or fax as well as name and numbers).
- Send only STAT specimens with the STAT courier. Routine, non-STAT specimens should be sent with the routine courier.
- STAT testing is only performed on one-time orders.
- Standing orders will not be accepted as STAT if the patient is sent to a Labcorp patient service center to be collected. You may request "same-day" testing for routine testing on a patient's standing order by noting "same-day" on the original test request form.

## STAT TESTING

# Houston, TX

Test Name	Test No.
Acetaminophen	<b>007740</b>
Amikacin, Peak	<b>007204</b>
Amikacin Random, Serum	<b>007203</b>
Amikacin, Trough	<b>007205</b>
