Labcorp's Rapid Response Test Menu for Oklahoma City, OK

Labcorp recognizes the evolving healthcare needs of physicians; simply put, certain test information is essential to help make immediate, informed decisions about a patient's care. Labcorp's goal is to provide you with STAT results within four hours of your request for pick up.

The following steps will help Labcorp process your patient's lab work when it arrives at the testing site:

- Verify that the STAT test(s) request is/are available on the STAT Test Menu and that the request is within the STAT hours of operation (see reverse).
- Label all specimens with two identifiers (patient's name, date of birth, and/or test request form ID label). Time of collection is required information on the test request form.
- If routine, non-STAT testing is needed in addition to the STAT test(s), collect separate specimens for the routine and STAT testing and submit each on a separate test request form. The non-STAT specimen cannot be picked up with the STAT specimens and will be picked up and tested according to our usual, non-STAT schedule.
- Call the Labcorp direct toll-free number for STAT pick-up service at 1-866-STATTWO (1-866-782-8896) and be prepared to provide:
 - Caller name;
 - Account's name and number;
 - Pick-up address;
 - Requisition or control number;
 - Patient's name and date of birth;
 - STAT test name/number(s);
 - Storage requirements (specify if specimen needs to be kept frozen);
 - Preference of STAT reporting (call or fax as well as name and numbers).
- Send only STAT specimens with the STAT courier. Routine, non-STAT specimens should be sent with the routine courier.
- STAT testing is only performed on one-time orders.
- Standing orders will not be accepted as STAT if the patient is sent to a Labcorp patient service center to be collected. You may request "same-day" testing for routine testing on a patient's standing order by noting "same-day" on the original test request form.

Oklahoma City, OK
