

San Antonio, TX

Labcorp's Rapid Response Test Menu for San Antonio, TX

Labcorp recognizes the evolving healthcare needs of physicians; simply put, certain test information is essential to help make immediate, informed decisions about a patient's care. Labcorp's goal is to provide you with STAT results within four hours of your request for pick up.

The following steps will help Labcorp process your patient's lab work when it arrives at the testing site:

- Verify that the STAT test(s) request is/are available on the STAT Test Menu and that the request is within the STAT hours of operation (see reverse).
- Label all specimens with two identifiers (patient's name, date of birth, and/or test request form ID label). Time of collection is required information on the test request form.
- If routine, non-STAT testing is needed in addition to the STAT test(s), collect separate specimens for the routine and STAT testing and submit each on a separate test request form. The non-STAT specimen cannot be picked up with the STAT specimens and will be picked up and tested according to our usual, non-STAT schedule.
- Call the Labcorp direct toll-free number for STAT pick-up service at 1-866-STATTWO (1-866-782-8896) and be prepared to provide:
 - Caller name;
 - Account's name and number;
 - Pick-up address;
 - Requisition or control number;
 - Patient's name and date of birth;
 - STAT test name/number(s);
 - Storage requirements (specify if specimen needs to be kept frozen);
 - Preference of STAT reporting (call or fax as well as name and numbers).
- Send only STAT specimens with the STAT courier. Routine, non-STAT specimens should be sent with the routine courier.
- STAT testing is only performed on one-time orders.
- Standing orders will not be accepted as STAT if the patient is sent to a Labcorp patient service center to be collected. You may request "same-day" testing for routine testing on a patient's standing order by noting "same-day" on the original test request form.

STAT TESTING

San Antonio, TX

Test Name	Test No.
Acetaminophen	007740
Ammonia, Plasma	007054
Amylase	001396
Bilirubin, Direct	001222
Bilirubin Fraction, Neonatal	205500
Bilirubin, Total	001099
B-Type Natriuretic Peptide (BNP)	140889
Carbamazepine, Serum or Plasma	007419
Cell Count, Cerebrospinal Fluid	005256
Chloride	001206
Complete Blood Count (CBC) With Differential, Reflex to Peripheral Smear Review	005009
Creatine Kinase (CK), Total	001362
Creatinine	001370
D-Dimer	115188
Digoxin	007385
Electrolyte Panel	303754
Estradiol**	004515
Fetal Fibronectin	120857
Gentamicin Random, Serum	007161
Gentamicin, Serum, Peak	007162
Gentamicin, Serum, Trough	007163
Glucose, Cerebrospinal Fluid	002048
Hemoglobin (Hb) + Hematocrit	031088
Human Chorionic Gonadotropin (hCG), β -Subunit, Qualitative	004556
Human Chorionic Gonadotropin (hCG), β -Subunit, Quantitative	004416
Influenza A and B, Direct Immunoassay	186064

Test Name	Test No.
Lactic Acid, Plasma	004770
Lipase	001404
Lithium	007708
Metabolic Panel (8), Basic	322758
Metabolic Panel (14), Comprehensive	322000
Methotrexate (MTX), Serum or Plasma	007658
Osmolality	002071
Osmolality, Urine	003442
Partial Thromboplastin Time (PTT), Activated	005207
Phenobarbital, Serum or Plasma	007823
Phenytoin, Serum or Plasma	007401
Potassium	001180
Pregnancy Test, Urine	004036
Progesterone**	004317
Protein, Total, Cerebrospinal Fluid	002055
Prothrombin Time (PT)	005199
Prothrombin Time (PT) and Partial Thromboplastin Time (PTT)	020321
Respiratory Syncytial Virus (RSV), Immunoassay	014548
Salicylate	007849
Tacrolimus, Immunoassay*	711034
Troponin I High Sensitivity	121175
Urea Nitrogen	001040
Urinalysis, Routine With Microscopic Examination on Positives	003038
Valproic Acid, Serum or Plasma	007260
Vancomycin Random Serum	070326
Vancomycin, Serum, Peak	070327
Vancomycin, Serum, Trough	070328

*Testing completed two hours after setup (must be received before noon)

**Available only Monday-Friday
