

LABCORP WHOLE HEALTH SOLUTIONS

Your holistic approach to
support comprehensive care

Scientifically backed testing to support whole-person healthcare for your patients

We understand that every patient is unique. For providers practicing holistic, whole-person healthcare, our evidence based test solutions help uncover root causes and deliver actionable patient insights to enable better care and health outcomes.

In the patient-provider relationship, nothing is more important than trust. From initial consultation to identification, diagnosis and treatment planning, your clinical decisions should be powered by scientific insight and clear, actionable results delivered in a simple, concise manner for every patient, every time.

Labcorp provides whole health solutions for patients in areas that include:

Cardiometabolic

Genetics

Neurology

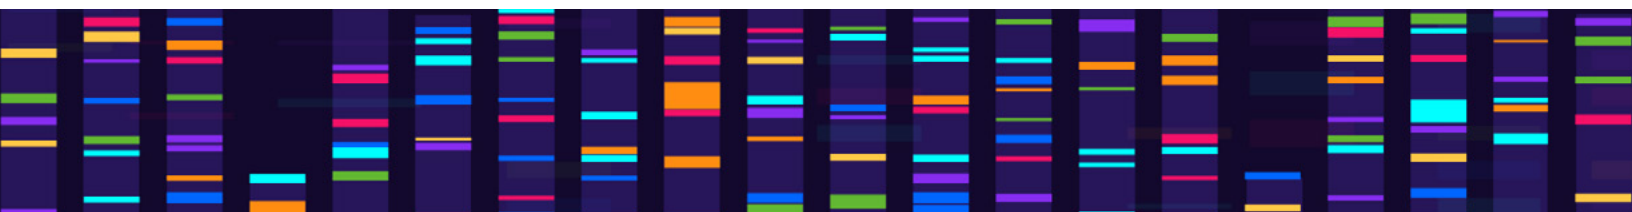

Allergy and Autoimmune

Gastrointestinal and Infectious Disease

Micronutrient Deficiencies

Hormone and Endocrine Assessment

COMPREHENSIVE WELLNESS TESTING CAPABILITIES

Labcorp Whole Health Solutions offers seven curated panels and a robust test menu designed with feedback from healthcare providers like you. This convenient approach to holistic patient health and wellness helps identify the imbalances that underlie various disease states and support prevention, diagnosis and management of chronic conditions.

Your single-source lab partner to support holistic patient care

To meet the needs of you and your patients, we support a root-cause approach with:

A comprehensive testing menu of more than **6,500 tests**, including more than **1,000 biomarkers** for tailored whole health approaches

More than **700 specialized MDs/PhDs** available for consultation, with research and publications available on whole health areas of interest

More than **2,200 patient service centers** (PSCs) offering appointments and walk-in specimen collection services

Courier services available for pickup of in-office collections

Consultants available for understanding of costs and upfront patient estimates where applicable

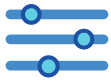

Integrated data and technology solutions to support providers and patients

Labcorp Patient™ Portal

With a focus on better health and wellness, patients are often taking a more hands-on, integrative approach to their own healthcare. To support this journey, Labcorp offers a dedicated patient portal where patients can:

- Gain secure access to lab testing information, including results, bills, appointments and more
- View patient-friendly test descriptions, result displays and trending results over time via full integration with all Labcorp testing
- Download and print their own test results
- Manage their schedule by making appointments and paying bills online

Labcorp Link™ and Diagnostic Assistant

With a wide variety of testing options, patient data and interface solutions, it's more important than ever to have clear, organized, charted results. Our electronic health record (EHR) companion and embedded solutions yield self-service capabilities to meet you where you are in your workflow, including:

- Seamless integration for specimen collection/pickup, patient data, billing and more
- Enhanced order-tracking in a single, unified interface
- Customizable, interactive dashboards to track trends and gain key insights
- Real-time access to Labcorp patient data and lab results

Labcorp Insight Analytics

Connecting the dots between population data and comprehensive care for your patients is crucial. With more than 50 years of national laboratory test values and patient demographics, Labcorp Insight Analytics reports can provide powerful data to help identify high-risk patient populations, determine opportunities to enhance care and improve healthcare delivery.

As more patients seek whole-person care, Labcorp is uniquely positioned to support you and your practice as a one-stop resource with trusted, scientifically backed tests that help identify the root causes of chronic conditions or health imbalances.
